

# OCTOBER DWARFISM AWARENESS MONTH

## Creating Awareness and Educating Society

Dwarfism is a condition of short stature caused as a result of a medical or genetic condition. For people born with dwarfism, the challenge is to be accepted and integrated into everyday society.

Dwarfism Awareness Month provides the dwarfism community the opportunity to educate society and create a better understanding of the lives of people living with a condition of dwarfism.

Acceptance

Equality

Changing attitudes

Integrate

Educate

Breaking down stereotypes

Celebrate
